

## **KOOLAN ISLAND PROJECT.**

Auspower is currently undertaking the supply of a new 12KV Eaton SVS/08 Switchboard and 2 new 2500KVA Step-up Transformers and Neutral Earth Resistors for the Power Station being installed on Koolan Island, off the North West WA Coast near Derby. The Switchboard includes 7 Circuit Breakers and a Bus Tie and delivery is expected to be completed in the next few weeks. This is a classic Auspower Eaton Project using Auspower Transformers and Eaton Switchgear and Resistors. More details will be posted as the Project progresses.
